

OBJECT

# APILA

Seinäjoki City Library

CONTRACTOR

Pohjanmaan Rakennuspelti Oy (PRP)

MATERIAL

Copper

MORE INFORMATION

Apila, the city library of Seinäjoki, has been built with Finnish copper. PRP designed, manufactured and installed façades and roofs for this object.

The façade consists of copper panes which are connected to the roof structure. No joints have been used on this object, and the design took into consideration the adjacent Aalto Center.

This is a unique object, with architects from around the world coming to see it.
